

Prevention Is Better Than Cure

With Belimed Prevent™, healthcare facilities are able to optimize the operational and financial performance of their Sterile Processing Departments (SPDs). Designed to create real value over the life cycle of equipment used in sterile processing departments, Belimed Prevent service packages comprehensively cover customer needs for preventative maintenance (PM) visits, repairs and parts, additional services and equipment lifecycle management.

Prevent machine downtime

Receive scheduled PMs and on-site support from a Belimed technician to keep your machines and SPD operations running smoothly.

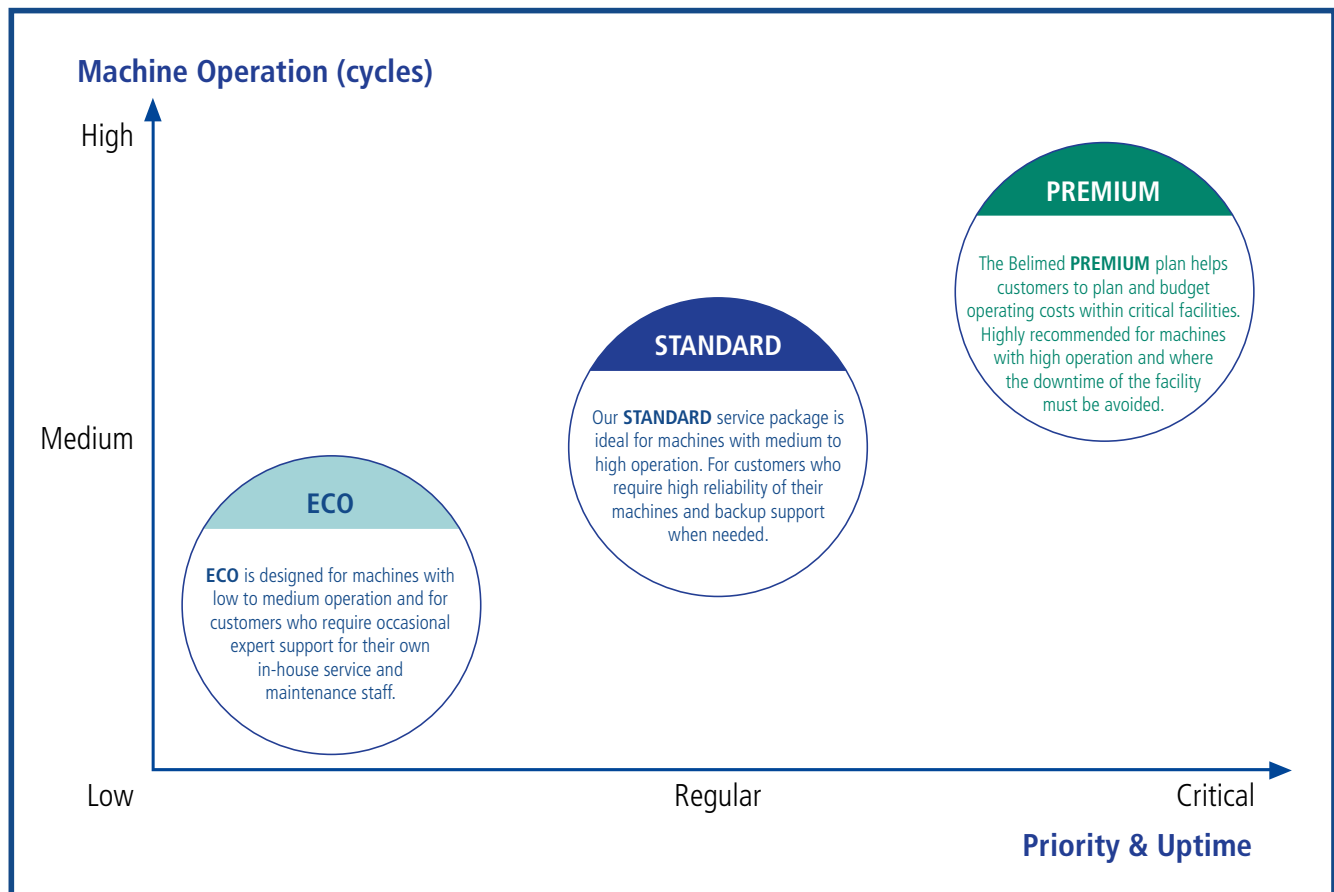

Prevent unexpected costs

Create financial transparency and prevent maintenance cost increases with Belimed's unique Total Cost of Ownership service contracts.

Prevent machine obsolescence effects

Determine the optimal time to upgrade your equipment to optimize your machines' Total Cost of Ownership.

Belimed service plan options are based on equipment cycles/usage rates and age. Choose from three Belimed Prevent packages which are designed to meet your specific needs while providing optimal value for your facility.

PREMIUM | Full-Service Plan

Designed for machines with **high machine operation levels and critical uptime requirements.**

Belimed Prevent Premium provides a tailored schedule of PM visits, parts, and repairs from Belimed techs. On-call technicians service your machines with guaranteed response times.

STANDARD | Cycle-Based Preventative Maintenance Plan

Designed for machines with **medium-to-high machine operation.** Belimed Prevent Standard provides preventative maintenance according to actual machine usage (cycles), in compliance with AAMI guidelines for maintenance.

ECO | Annual Preventative Maintenance Plan

Designed for machines with **low-to-medium operation levels.** Belimed Prevent Economy provides an annual preventative maintenance visit. Additional services available on a fee for use basis from our expert technicians.
