Dear Sterile Processing Professionals,

Looking back on the year 2020 we will be able to say that we never worked harder to support the institution of U.S. healthcare delivery and the overall safety of patients and healthcare providers across the country.

I sincerely want to applaud and honor you for your tireless dedication in keeping your sterile processing departments running, providing support to other areas of the hospital, dealing with budget constraints, and keeping up department morale during this challenging time. By staying true to your mission, you continued to do whatever was asked of you to support those on the front line caring for COVID-19 patients and hospital staff, as well as your ongoing responsibilities.

Moreover, I want to thank you all for your continued confidence in Belimed. It means so much to everyone here to know that when things get tough, you see us as a trusted partner to support you and your facility.

Everyone at Belimed is committed to a brighter future. As Engineers of Confidence, we are dedicated to constantly improving our full line of solution-focused products and services to support you, now and in the future.

Sincerely,

William (Bill) Yaeger
President, Belimed, Inc.
